

See what you can be

Here's what has happened in the last month and what's to come!

Welcome to our October 2025 newsletter! We are thrilled to share the latest updates from the **empowerHER pathways** program.

In terms of our recent activities, we held an information session in Maitland for participants of Mai-Wel's Parent to Pathways program. Not only did participants learn about the **empowerHER pathways** program but also had the pleasure of hearing from an inspiring guest speaker.

Liz Murray, Leadership Coach at Edge of Possibilities, shared her insights on personal development - building confidence, purpose and self belief. Participants left with an action plan and encouraged to set goals that stretched their confidence.

Atwea College touched on the importance of training with Glenda demonstrating how to access the TAFE short micro skills courses that are provided free of charge. Laurie from the Financial Literacy Academy, University of Newcastle gave an insightful presentation on understanding finances, and how to secure online data.

Glenda and Sarah recently attended the Workforce Australia Local Jobs Apprenticeship and Traineeship Day at Doyalson. It was a great opportunity to showcase the **empowerHER pathways** program initiative and connect with local industry and communities from the Hunter, Central Coast, Sydney North and surrounding regions.

Together, we can make a real difference in the lives of women to unlock their potential and see what she can be. Enjoy this month's newsletter!

Quick tips for finding a rewarding career in Renewable Energy - *contribute to achieving our NET Zero goals!*

Education and Certification

- Research renewable energy-related degrees or certifications
- Enrol in a relevant course or program
- Complete certification in areas like solar, wind, or hydrogen energy

Hands on Experience

- Apply for internships or apprenticeships
- Seek entry-level roles in renewable energy companies
- Volunteer for sustainability projects or initiatives

Networking

- Attend renewable energy conferences
- Join professional associations or LinkedIn groups
- Participate in career days and industry meetups

Stay Informed

- Subscribe to renewable energy news outlets or journals
- Follow trends in hydrogen energy, battery storage, and smart grids
- Take short courses or webinars on emerging technologies

Resume and Job Applications

- Update resume with relevant skills and certifications
- Customise cover letters for each job application
- Highlight hands-on experience and industry knowledge

Expression of Interest

Are you curious about how the wind powers the world? Thinking about a career in the renewable energy sector? This interactive course - *Introduction to the Wind Energy Industry*, is your chance to explore the exciting world of wind energy and discover how you can be part of Australia's clean energy transition.

What's the course about?

In just two engaging hours, you'll:

- Learn how wind is transformed into electricity
- Understand how the wind energy industry operates
- Explore a wide range of career opportunities in this fast growing field

Why Join?

- **It's no cost** - Thanks to the **empowerHER pathways** program
- It's interactive and in-person - meet with others, ask questions and be inspired
- You'll gain clarity on how to enter or grow within the energy industry
- Entry level micro-skill course

What happens next?

After the course we'll dive deeper into training and employment pathways - helping you to take the next step toward a rewarding career in the renewable industry.

Build a PC, Build Your future

At the heart of IC Solutions work is **The Remakers' Space**, their workshop and community hub where people can see the process, ask questions, or get help with their devices (and even help repair their own devices). There are no fancy fit-outs or big investors, just a small team focused on doing real good with real hardware and real people. Through their hands-on workshops, **empowerHER pathways** participants will learn to build their own PCs, gain tech skills, and take home a computer they assembled themselves. It's a great step toward digital empowerment.

Want to register for the Build a PC workshop or donate old tech?

Visit the **empowerHER pathways** [website](#) to apply now to be a participant in this inspiring initiative or to donate, contact IC Solutions: Call anytime - 02 496 00581
